

ROSE WEST

Born Evil?

Documentary investigating the childhood of the sadistic
serial killer and what led her to become a murderer

ROSE WEST

Born Evil?

This documentary tells the story of Rose West from baby to mother to murderer. This is a side to one of the world's most notorious criminals that viewers have never seen before - her childhood. Using incredible first-hand accounts from people who knew her as a child; neighbours, friends and relatives, we'll go through the key turning points in her upbringing that made her the killer she was to become.

By intercutting between her harsh childhood and the psychopathic tendencies she presented in later life and the despicable crimes she would go on to commit, plus with the advice of on-screen psychologists; the viewer will get a better sense of why Rose West became the serial killer of at least 10 young women.

1 x 60 for Channel 5
