

IT'S THE SHOW THAT ASKS... HOW AND WHY DID THEY DO THAT?

STUNT SCIENCE

**IT'S THE SHOW THAT ASKS...
HOW AND WHY DID THEY DO THAT?**

STUNT SCIENCE

How does a kite surfer fly over Brighton Pier?

How does a base jumper launch himself off a moving bridge?

How can a skydiver survive an 8-kilometre plummet without a parachute?

Join us to celebrate the most eye popping stories and clips of stunts, pranks and home experiments ever attempted...all caught on camera! A series of experts are on hand to examine the most surprising of these clips as they are broken down into their component parts as we forensically explore the science of what we are watching.

Prepare to see people doing things you have never seen before...from home science experiments to sporting attempts; dare devil trickery to good old fashioned innocent mistakes that have disastrous (and often hilarious) consequences.. Fun, unexpected, and revealing... this is Stunt Science!
